
LIZARDS

What colour are the lizards?
They can be green and yellow,
They can be red and brown,
They can be blue and gray.

But some of them
Change colours
They can be very different!
They can be green and yellow,
They can be red and brown,
They can be blue and gray
During one day!

? What colours are the lizards?
Are they big animals?
Where do they live?
Do they like to lie in the sun?
Can they fly? Can they swim?
Do you like them?
